*For selected lens(es) only

HIGH VELOCITY IMPACT TEST

HIGH MASS IMPACT TEST

LENS REMOVAL

- ① Gently pull out one end of browguard
- ② Gently pull out other end of browguard
- ③ Gently lift up nose pads, grip lens firmly and pull downwards to remove lens from frame
- ④ Gently pull aside to separate prescription insert from browguard

NOTE

Owing to the impact rating of the eyewear, the lenses may require a little effort to remove. The lenses are meant to fit tightly into the frame. So that any strong impact will not cause the lens(es) to separate from the frame.

LENS INSERTION

- ① Firmly grip the frame, and slot in one end of lens
- ② Slot in other end of lens
- ③ Squeeze the lens and the frame together until you feel a click.
- ④ Align browguard to center guide hole
- ⑤ Gently push in one end of browguard
- ⑥ Gently push in other end of browguard
